Question #3: Explanation

Alexander Vilenkin Professor of Physics and Cosmology

"With the proof now in place, cosmologists can no longer hide behind the possibility of a past-eternal universe. There is now no escape, they have to face the problem of a cosmic beginning."

Stephen Hawking

Theoretical Physicist and Cosmologist

Roger Penrose Mathematical Physicist and Philosopher

"Almost everyone now believes that the universe, and time itself, had a beginning at the Big Bang."

2nd Law of Thermodynamics [thur-moh-dahy-nam-iks] (AKA: The Law of Increased Entropy)

While the quantity of energy within a closed, isolated system (like the Universe) remains the same, the amount of usable energy deteriorates gradually over time.

As usable energy is irretrievably lost, disorganization, randomness and chaos increase.

David Michael and Sofia Gabriela investigated the case for Jesus with Cold-Case Christianity for Kids

Congratulations to Sophia for attending our conferences and Congratulations to Brayden Ganino! Great job completing the investigating the case for Christianity

Academy and earning your Certificate.

Congratulations to Ryan Loftin for his dedication in completing his Academy Notebook!

Congratulations Ben Loftin! You're doing a great job working through the Case Makers Academy.

Three Case Makers sharing the case with a Pastor they met

Congratulations Olivia! You're now a Christian Case Maker

Congratulations Anthony and Eliana! You're official Christian Keep learning cadets! And be sure to earn your Graduation Case Makers!!!!

Certificates!

Congratulations to all the cadets who have completed the fill- Trev Ramey investigated the truth about Jesus and now he's a ins and activity sheets! believer!

These for young Case Makers are ready to start the God's Crime Scene for Kids Academy!

Could the Universe Be Expanding Eternally?

Stephen Hawking A Brief History of Time

Imaginary Time?

"Only if we could picture the universe in terms of imaginary time would there be no singularities. ...When one goes back to the real time in which we live, however, there will still appear to be singularities."

Hawking / Hartle Imaginary Time

"Brane Cosmology"

Paul Steinhardt Neil Turok Theoretical Physicists

A membrane governed by speculative physics exists at one end of the fifth dimension

This membrane exists at the other end of the fifth dimension. It will eventually become our universe

Additional membranes move within the five dimensions

When one of these membranes collides with ours, it creates the expansion we observe

Speculative to say the least
